PROJECTS

WIRELESS ARDUINO CONTROLLED FIRE FITTING ROBOT

This project is to develop an automatic fire-fighting robot capable of detecting, responding to, and extinguishing fires without human intervention, thereby reducing the risk of human casualties in fire fighting operations,

The robot will operate automatically, utilising advanced sensors. The primary focus is on creating a reliable and efficient system that can operate autonomously to minimize the potential for human fatalities during fire emergencies

- Access to hard-to-reach areas.
- It can reduce the risk of the injury or death to human firefighters
- Temperature identification
